

Customized Luxury Glass Geodesic Dome for Glamping & Camping

The transparent glamping glass geodesic dome can be customized from 3 meters to 12 meters in diameter. The glass geodome tent is a big innovation in the frame and the cover. The frame of glass dome tent is made of high-strength lightweight aluminum alloy. At the same time of safety and wind resistance, the lightweight material still retains the characteristics of easy transportation and quick construction!

The glass spherical dome tent cover does not have the choice of conventional PVC fabric, but the choice of fully transparent glass or colorful Glass, which

not only enhances the weather/snow resistance of the glass geodesic dome, but also enhances the value of the entire tent. Provide you with a tent space that can be in close contact with the outdoors!

Glass geodesic dome kit house safety performance:

1. Waterproof performance - Glass has good waterproof performance, even if there is heavy rain outdoors, it has no effect on the tent.
2. Flame-retardant performance - The glass or PC board material used in the tent coverage has been tested by many international agencies, and the fire safety has reached international standards.
3. Wind resistance - The tent frame uses a unique reticulated shell structure and high-strength aluminum alloy profiles to withstand high winds of 100-120km/h.
4. Stable construction - The tent can be easily built in any venue, even on soft grounds such as mountains, meadows, beaches, deserts and so on.

The glass geodesic dome tent has a wide range of outdoor applications, not only for tent house in outdoor resorts, but also for large-scale glamping domes for high-end commercial events, large-scale exhibitions, etc.. It brings a better experience at the event with super high values and unique structure.
