Shape	Cone
Structure	Q235 Steel, Hot Dip Galvanized
Warranty	20 Years
Delivery Time	About 30 Days after confirm deposit
Payment	T/T, LC
Brand	BDiR
Place of Origin	Shenzhen, China

Shenzhen, located in the south of Guangdong province, adjacent to Hong Kong. One of the largest financial centers in China. Shenzhen Venice Hotel, located in the beautiful OCT, Shenzhen Bay. The first international five-star standard business resort in China with the theme of Venetian culture. The hotel is close to the famous theme park World Window, Splendid China and Folk Culture Village.

In July 2015, BDiR installed tensile structures for the Venice Hotel included entrance tensile fabric structure and swimming pool shade structure. The project area is over 1500 square meters. Modern shape, classic atmosphere, white roof, clear texture, soft light, add a icing to the five-star hotel! PVDF has a high degree of self-cleaning function and stability, and can guarantee excellent performance from - 70 degree centigrade to + 40 degree centigrade.

We use steel cable structure and no glare lighting system, indoor light is transparent, and the temperature is moisturized in winter, which gives people a comfortable space.

In addition, during the construction process, we attach great importance to welding, grinding, painting, etc., because only in this way, we can perfectly match a five-star hotel. After the completion of the project, it was highly recognized by Steve Joe, the hotel marketing manager.
